There are some predefined accounts in the database and all their passwords are: 123456

You can add your own account if you're an Event Organizer or Event Enthusiast from the sign up page

But if you want to log in as Admin or as Support so you should add this manually in the database

With @eventhuba.com for admin

And @eventhubs.com for support

But as I said before there's some predefined accounts you can use it.
